Professional Experience

Freelance - Goldtusks

2022 – Present

Senior Full Stack Developer

- Led and supported a team Unity developers.
- Developed and shipped mobile apps and games reaching millions of users.
- Built dashboards, authentication flows, analytics systems, and internal tools contributing to mobile, web, and Unity developments process.
- Designed backend systems (**NestJS** + **Firebase**) powering mobile applications, web tools, services and gameplay features.

Sensepass

2019 – 2021

Backend & Mobile Developer

- Developed Android SDKs used by enterprise payment partners.
- Built and maintained high-performance APIs using **NestJS**.
- Migrated **MongoDB** backend infrastructure to **PostgreSQL** & **AWS**.

Bank Hapoalim

2016 – 2019

Senior Android Developer

- Developed major Android features for one of Israel's most widely used banking apps.
- Worked in a large Agile/Scrum environment with **Jira**, collaborating closely across multiple squads.
- Participated and led daily standups, facilitated Agile processes, and supported coordination between teams.
- Mentored junior developers and delivered internal training sessions on modern Android development practices.

SportArena

2014 – 2016

Android Developer

- First professional Android role—joined a fast-paced startup with a small 3-developer Android team.
- Built complex integrations, improved UI/UX, and optimized the app under tight timelines and long development cycles.
- Gained deep hands-on experience through rapid iteration, problem-solving, and high-ownership development.

EchoT Green Paper

2012 – 2014

Android Developer

Personal project that delivered Android experience to tv.
Placed tv's in elevators with CMS to control Buildings or Cities.
Strong App that cannot fail and work without web connection.
